Post-event motion with the co-event dike pattern and the exponential decay fit
(total 0.152 of the co-event signal, decay time 4.3 days; a descriptive fit)
pre-event null range (|max| 0.024, σ 0.017)
Sentinel-1 post-event window
decay fit, window-integrated
NISAR window (not used in the fit)
18 July
projection on the co-event dike pattern
(fraction of co-event signal)
